

25,400
lives lost

each year from smoking-related illness

AND IT STARTS IN OUR STORES.

Prescription FOR CHANGE[®]

- Tobacco products are highly addictive and responsible for the preventable death of 25,400 people in New York each year.
- It is a conflict of interest for pharmacies, providers of healthcare, to also profit from the sale of tobacco which is known to cause cancer, heart and pulmonary diseases.

▶ **I support ending the sale of tobacco products at pharmacies.**
