

**Why are drugstores
and pharmacies
still selling**

**TOBACCO
products?**

It's time to end this practice.

Tobacco *free* **NYS.org**

- Tobacco is the only legal product that when used exactly as intended will kill half of its long-term users.
- It is a conflict of interest for drugstores and pharmacies to sell tobacco products when it is known to cause cancer, and heart and pulmonary diseases.

I support ending the sale of tobacco products in drugstores and pharmacies.
